

RAMA BHATTARAI

Full Stack Developer

Biratnagar, Nepal | bhattarairama234@gmail.com | 9806024150 | linkedin.com/in/ramabhattacharai | github.com/RamaBhattacharai

Summary

Full Stack Developer with hands-on experience building and maintaining production web applications using React, Next.js, TypeScript, Node.js, and relational databases. Experienced in frontend architecture, reusable component development, REST APIs, database design, authentication and authorization, real-time applications, and production deployments. Strong experience building business applications across real estate, insurance, recruitment, HR, POS, and education, with a focus on scalable architecture, reliable workflows, and accessible user interfaces

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), PHP, HTML5, CSS3
- **Frontend:** React, Next.js, React Router, Tailwind CSS, TanStack React Query, Zustand, Redux Toolkit, React Hook Form
- **Backend:** Node.js, Express.js, NestJS, REST APIs, WebSockets, Socket.IO
- **Databases & ORM:** PostgreSQL, MySQL/MariaDB, MongoDB, Prisma
- **Authentication & Security:** JWT, OAuth 2.0, SSO/IAM, RBAC, OTP/2FA
- **Caching, Messaging & Storage:** Redis, RabbitMQ, MinIO, S3
- **Testing & Quality:** Jest, Vitest, React Testing Library, Zod, Joi, ESLint, SonarQube
- **UI & Development:** Storybook, Framer Motion, GSAP, Figma
- **DevOps & Tools:** Docker, Nginx, Drone CI/CD, Swagger/OpenAPI, Git

Experience

Full Stack Developer — Gitgi Foundation

Sep 2025 – Present

LMS Platform — Multi-Service Architecture (In Progress)

Next.js, React, TypeScript, PostgreSQL, Prisma, Redis, Socket.IO, MinIO, BullMQ, Whisper AI

- Designed the overall system architecture for a multi-service LMS with independently deployable learning and real-time communication services, separate databases, shared JWT authentication, refresh-token rotation, and service-to-service communication.
- Designed the PostgreSQL database architecture for users, courses, modules, lessons, enrollments, progress, and multilingual content, supporting six lesson types, structured content validation, publishing workflows, and enrollment-based access control.
- Developing the LMS frontend and learning workflows using Next.js, React, TypeScript, and TanStack React Query, with reusable components for course authoring, content delivery, enrollment, and student progress.
- Building real-time communication features with Socket.IO, including chat, presence, message delivery status, threaded Q&A, and instructor broadcasts, with WebSocket-level authorization.
- Developing an AI-powered learning assistant and multilingual content system, enabling course-aware student conversations localized course content across multiple languages, with persistent notifications and MinIO-based file storage.

- Built application and audit logging with Winston, protecting sensitive data and tracking important security events such as failed logins, token reuse, and rate-limit attempts.
 - Containerized the LMS services using Docker and Docker Compose, defining the application, database, Redis, and supporting services, and handled the workflow for moving changes from development to the main/deployment environment.
-

BS Realty LLC — Real Estate & Insurance Platforms

Next.js, React, TypeScript, Tailwind CSS, TanStack Query, Zustand, Storybook, Node.js, Express.js, Prisma, MySQL/MariaDB, Socket.IO

- Built real estate and insurance platforms from the ground up with Next.js and React, covering customer websites, admin dashboards, role-based portals, property, insurance, appointment, and inquiry workflows.
 - Implemented end-to-end customer workflows, from multi-step form submission and account creation to insurance quote processing, admin review, and customer-facing status updates.
 - Converted Figma designs into responsive production interfaces, building complex forms, dashboards, data tables, modals, quote flows, and reusable UI components with Tailwind CSS, Zustand and Storybook.
 - Improved Next.js performance and SEO through lazy loading, code splitting, optimized rendering, dynamic metadata, page titles, meta descriptions, and search-friendly page configuration.
 - Designed the underlying database models and business workflows for users, agents, properties, insurance applications, quotes, appointments, and inquiries using Prisma and MySQL.
 - Engineered a timezone-aware appointment scheduling system with transaction-based conflict detection, business hours, and blocked dates to prevent double bookings.
 - Integrated Socket.IO, Twilio, email, and mapping services to support real-time updates, notifications, appointment workflows, and location-based features.
-

Full Stack Developer — Deskgoo

Jan 2025 – Sep 2025

Retail POS & Inventory Management System

React, Node.js, Express.js, PostgreSQL, Prisma, JWT

- Built a full-stack retail POS system covering sales, billing, inventory, suppliers, products, and reporting.
 - Developed React dashboards and REST APIs for checkout, inventory, products, suppliers, sales, and reporting workflows.
 - Implemented checkout and inventory workflows including barcode lookup, hold/resume sales, tax calculations, refunds, and concurrent stock updates.
 - Designed PostgreSQL data models with Prisma ORM and implemented JWT-based authentication and role-based access for administrative operations.
-

HR & Applicant Tracking Platform

React, TypeScript, React Router, TanStack Query, Tailwind CSS, Storybook, Node.js, Express.js, PostgreSQL, MySQL, Prisma, JWT, OAuth 2.0, Socket.IO

- Built an integrated HR and Applicant Tracking Platform covering the hiring lifecycle from job posting and candidate application through screening, interviews, hiring, and employee onboarding, alongside employee, leave, payroll, tax, and performance management workflows.

- Translated Figma designs into responsive, reusable React interfaces and dashboards for candidate, recruiter, manager, and employee workflows, using TypeScript, Tailwind CSS, React Router, and TanStack Query for API state management, caching, pagination, and data synchronization.
 - Developed and integrated reusable Storybook components through a shared NPM design-system package, improving UI consistency and component reuse across recruitment and HR modules.
 - Built REST APIs and database workflows using Node.js, Express.js, Prisma, PostgreSQL/MySQL, and RBAC, supporting candidate applications, recruitment workflows, employee records, leave, payroll, and performance management.
 - Implemented secure authentication and real-time workflows using JWT, refresh tokens, OAuth 2.0, two-factor authentication, and Socket.IO, including role-based access for candidates, recruiters, managers, and employees.
 - Built a timezone-aware interview scheduling workflow integrated with Google Calendar and handled calendar conflicts, daylight-saving changes, failed synchronization retries, and automated candidate-to-employee transitions; validated critical application and API workflows with Jest tests.
-

EDUCATION

First Class Honours

Bachelor's in Computer Systems Engineering
ISMT College | 2022 – 2026
